## Warnings and Precautions

Do not expose adapter tubes to temperatures above room temperature (~25 °C) for extended periods.

## Application

The KAPA Universal Adapter is a truncated adapter used during ligation-based library construction for sequencing on Illumina® instruments. A pair of unique, 8-nucleotide sequencing indices (barcodes) are added by PCR for use in single sample or multiplexed sequencing applications. The KAPA Universal Adapter has been manufactured by duplexing (hybridizing) two oligonucleotides and is designed to ensure high library construction ligation efficiency and low adapter-dimer formation.

## Number of Reactions

The supplied KAPA Universal Adapter is sufficient for 96 or 4 x 96 library preparation reactions.
